Professional Summary

Experienced Software Engineer with over 6 years of expertise in developing scalable SaaS products and designing robust microservices architectures. Specializing in Laravel, I excel in building high-performance backend systems, creating efficient RESTful APIs, and developing modular, scalable architectures. I focus on optimizing system performance and delivering innovative solutions that drive business growth. Passionate about leveraging Laravel and cutting-edge technologies to build user-centric products that address complex challenges.

Professional Experience

Software Engineer | weDevs, Dhaka

December 2021 - Present

Key Responsibilities:

- Lead development of WordPress product management and licensing solutions
- Design microservices architecture using Docker and cloud technologies
- Implement secure payment processing and analytics systems
- Maintain automated deployment pipelines and cloud infrastructure
- Drive technical decision-making and system optimization

Projects:

1. Appsero (WordPress Theme/Plugin Management Platform)

- Built comprehensive licensing and analytics platform for WordPress products
- Integrated multiple payment gateways (Stripe, FastSpring, Paddle) and e-commerce platforms (WooCommerce, EDD, Gumroad)
- Developed customer portal for product downloads, license management, and purchase history
- Created analytics dashboard for tracking product usage and sales metrics
- Implemented automated deployment system across multiple platforms (GitHub, GitLab, Bitbucket) to Google Cloud/WP.org

2. weMail (Email Marketing Platform)

- Developed standalone SaaS application interface for WordPress plugin users
- Implemented drag-and-drop email builder and campaign management features
- Integrated campaign management and publishing features

Web Application Developer | Alesha Tech Limited, Dhaka

April 2021 - November 2021

Key Responsibilities:

- Developed scalable e-commerce solutions and learning management systems
- Optimized application performance and user experience

Projects:

1. **Alesha Mart:** Multi-vendor e-commerce platform with advanced inventory management
2. **LMS:** Real-time collaborative education platform

Freelance Web Developer

January 2018 - March 2021

- Developed a range of business solutions including ERP systems, e-commerce platforms, LMS, and payment integration services
